### Role of SSD

SSD has developed a very transparent system to ensure accountability and transparency. The process starts with identification of schools from which the children are to be selected. The schools have to meet a minimum criteria developed by SSD. This is done to ensure that children who will be sponsored will get quality education. In the next stage, SSD teams identify the deserving children with support from community and school authorities. If it is established that the child is facing problems in continuation of education due to economic issues, the child is selected. Details of the children are provided to sponsors for support. SSD team regularly monitors the progress of the children in the school who are being sponsored to ensure that funds provided by SSD are utilized properly. Regular monthly updates are

provided by the education of the sponsored children to the sponsors. SSD also organizes meetings of the sponsors with the children if they desire. All the funds donated for children's education are managed separately for ensuring complete transparency. SSD has highly qualified financial team which has developed a sound system for tracking of funds and their proper utilization.
